Master of Social Work Degree

Post Graduate Certificate in Ecometric Assessments

Adult & Child Ecometric Assessment

The aim of an Ecometric Assessment is to scientifically measure a person's current functioning within a problem situation. The aim is also to lead the client to optimal functioning. Focus is given to the manner a person adapts to their environment and to establish whether help is needed through referrals.

Career Planning Assessment

Career and school subject decisions are temporary with long term effects, therefore there is a need for career counselling and guidance. Focus is given to interests, values, self-esteem, strengths, etc. in order to guide the person to make decisions which will be beneficial on a long-term.

Ecometric Assessments

- Adult Assessment
- Child Assessment
- Career Planning Assessment
