Supervised Visitation

The aim of supervised visitation is to assist parents / caregivers where they can only have contact with the child/ren under supervision of a professional person due to a court order. The aim is to observe and ensure the safety of the child concerned and it is not an Interactional Analysis Assessment where the social worker can make recommendations pertaining to care and residency of the child/ren.

Supervised visitation will take place on the premises of Childline Free State, but can be arranged to take place at a different location at an extra cost.

A report can be provided based on the observations of the social worker on request.

Please note that the stipulations of the court order will be adhered to in all cases in regard to the duration and frequency of contact allowed.
